Public Service Commission
of South Carolina

I hear that our light bills once again is going up. When I moved here 12 yrs ago. My light bill never went over \$65.00 a month.

I live in a 12x60 mobile home.

I have been doing some investigating and found out that SCD E reads the electric bills twice instead of once a month.

I have saved all my electric bills. Georgia, reads it's customers bills, once.

I have a good friend who has been working for the electric company. He said he never heard of the way SCD E reads the power, Metc Baywell Co., Bamberg SC. They do not have a second reading.

People on SSD like my disable Veteran husband and I cannot afford 300 and over, a month electric bill. So the ones sitting in the office can get a raise every year. And new or fancy homes and new new cars,

I am going to write the Governor, and the Senator, which is him - It is terrible to do this to South Carolinians like gas gaugeing.

Our - PG

2. The news media needs to know how different S.C.G.E. is. How they treat their Customers. Estimating their Electric Bills. Guessing

I hear no other Company is like S.C.E.

I would love to go on television and tell them how S.C.G put a ^{new} meter in, a new one that was slow, They, not me. Then the Company charged us for S.C.E \$100.00 because of their mistake. Not properly installing the meter.

I'm a retired fire fighter. We had to learn about meters, and the pole cut-off.

How a Meter can be set, up or down from and office. The speed of a meter.

S.C.E. Electric don't need to raise peoples light bills no higher, for S.C.E. fair.

I have only one meter; that meter only needs reading once. I have checked different towns, Denmark, one reading of light bill.

I have saved all my light bills. Because if I find out, I was done wrong. The readings, then S.C.G will owe me all that back pay. I have family. That works for Georgia Power, they said, S.C.E - is doing something wrong, about how they read electric meters. Over Charging

over

I have several emails to write. And the
President, Senators, to email about
this Company.

South Carolina is one of the most powerful
states. We don't need no more elected bill
here.

Thank you for reading this -
